Price: \$2.00 Per Year

Resigns Premiership

Edmonton, Alta., Nov. 23.—Premier Herbert Greenfield, leader of the former government, since he took over the reins of office from the former Liberal administration in 1921, tendered his resignation to Lieut. Governor Brett at 11:30 this morning, recommending that his honor ask Attorney General J. E. Brownlee to form a government.

Premier Brownlee was sworn in immediately thereafter.

The Ladies of the Congress wish to thank all those who helped in any way with their Bazaar and Supper, to make it a success.—H. Boyd, Sec.

Bindloss W.I. To

Assist Hospital

The Bindloss W.I. met at the home of Mrs. W. Bicknell, on November 18. A motion was passed that we help the Empress Hospital, the help to be in the nature of a shower, which is to take place at the next meeting on December 9th, at the home of Mrs. Jack Barnes. All members, also non-members, who wish to help, may do so.

The program of our November meeting consisted of a reading by Mrs. Dan McRae, "Telephoning a Telegram."

A guessing contest was put on by Mrs. Thompson. The prize, a bon-bon dish was won by Mrs. H. H. H. H.

Mrs. Frank Gallup, gave a reading entitled, "Getting Ready for Winter."

This being our annual meeting, election of officers took place as follows:

President, Mrs. T. C. Rogers.

1st Vice-Pres.: Mrs. Jack Barnes.

2nd Vice-Pres.: Mrs. Dan McRae.

3rd Vice-Pres.: Mrs. Thompson.

Secretary-Treas.: Mrs. Frank Gallup.

Corresponding Sec.: Mrs. Kiergaard.

Directors: Mrs. Chudleigh, Mrs. Baughen, Miss N. McDonald, Mrs. Frank Staples.

Auditors: Mrs. Chudleigh and Mrs. D. Rogers.

Programme committee for December meeting: Mrs. D. Bicknell and Mrs. H. H. H. H.

Lunch committee: Mrs. Kiergaard, Mrs. Rogers.

Roll Call: Some Christmas suggestions.

FOR SALE

AT ONCE—One brass bed, springs and mattress, one library table, dining table, gas lamps, one parlour suite, three englewood rugs, one heater, one kitchen table and sink, and other numerous articles.—Enquire at dental office.

NOVELTY BAZAAR

Fortunes Told; Hands and Teacups Read

Madame Zuleksa, of Karavan, and Madame Onskari, of Verdigris, have promised to be present at the Novelty Bazaar, to be held next door to the old Post-office site, on Saturday afternoon, December 5th. A fish pond with delightful novelties will also tempt you, and a booth of home made goods in pleasing containers, and dozens of Christmas present novelties will be such a would make Santa Claus himself envious. [We fancy he would be well advised to look in and buy, for there are many gifts for child.] Delicacies afternoon tea will be served, after which one may have one's cup read by the Seer. Perhaps the best of all would be a trip through the Museum, where all kinds of freaks and curiosities will be on view. Especially would we advise the children not to miss this.

The Bazaar is being held by the girls of the Senior Canadian Girls In Training Group, in an effort to secure funds for the purchase of a photograph for the local hospital for Christmas. Ladies and Gentlemen of the country and town will be welcomed from 3 to 6:30, while special prices will be given to children from 2:00 to 2 p.m.

How About Heredity?

By Dr. C. M. Hocks, Medical Director, Canadian National Committee for Mental Hygiene.

All bad mental traits are by no means due to bad heredity. When parents say, "Tommy inherits his father's bad temper," they should modify the remark by saying that, "Perhaps Tommy inherits the tendency to the exhibition of bad temper."

Too often parents believe that inheritance has given their children bad characteristics. The mother is nervous, the father is given to tempestuous fits of anger—and they think the children inherit these qualities. Mental traits, so experts say, are certainly developed and often controlled by environment. For example, many people are afraid of lightning. The loud crash of thunder frightens them, but not the brilliant light alone. Fear can be taught, so can courage.

Since environment plays such a big part in the acquisition of good mental habits, it can be

District Men With The Prize-Winners At Corn Show

In the recently held Provincial Corn Show, at Lethbridge, local growers were to the fore with their exhibits against their more southerly located competitors. It is pleasing to see this evidence of continued interest in this branch of the farming industry, and we congratulate local exhibitors on their success. The varieties in which district men succeeded in getting placed are as follows:

Quebec No. 28—1. Golden Valley Irrigation Co.; 2. G. E. Chudleigh, Bindloss; 3. Ernest Heald, Medicine Hat; 4. John Polk, Coleridge; 5. J. J. Muze, Empress; 6. J. W. Hamilton, Empress; 7. J. W. Hutchinson, Bindloss.

First, any other variety—1. D. Hollinger, Redcliff; 2. D. Ottensmeyer, Milk River; 3. W. Jensen, Carleton Place; 4. J. P. McLeod, Foremost; 5. B. Hanson, Orion; 6. P. W. Tucker, Iron Springs; 7. J. W. Hamilton, Empress; 8. G. Thompson, Milk River; 9. A. O. McNeil, Seven Persons; 10. C. F. Ouder, Milk River.

Sheaf Quebec No. 28—G. E. Chudleigh, Bindloss.

In the ten-year classes there were nearly 1600 entries, and in the 100 ear classes, nearly 500 entries. Entries of sheaves were few.

readily understood that the right time to avoid bad mental habits of adults is to prevent their development in early years.

United Church

Sunday School, 2 p.m.

A sense of responsibility for the proper guidance and efficient religious training of youth should weigh heavily upon us. Jesus is unique in his expression of concern and love for children. He warns us that those who cause little ones to stumble through willful ignorance, careless indifference or selfishness, might better never have been born.

Public Worship, 7:30 p.m.

Come to church and mingle with others of the community in the search for truth and God. Good hearty singing, pleasing choir music, reverent prayers and Scripture reading. A helpful message. Your presence at church will do you good. Your example will help others to come. Sermon by the minister. Story sermon for boys and girls. Music.

Antiphon: "The Lord Knows Why."

OTHER SERVICES

Death of Queen Alexandra

The death of Queen Alexandra, Empress of India, occurred at Sandringham Palace, England, in the early hours of Friday November 26. Deep sorrow marks the passing away of the Dawager Queen. Special services throughout the Empire are being held, and one of the most impressive funerals England has known is being planned for the late Queen mother, Friday, November 27, colored. Lecture reading will be given by Rev. N. W. Whitmore.

These evenings are open to the public, old and young are invited. A collection will be taken to defray expenses.

A Novel Method Is Used By Overseas Representative To Advertise Canadian Goods

There was held at the Hotel Cecil on the Strand, London, England, on October 22nd, a somewhat novel dinner, to wit a dinner where every item on the menu, even to the few cream, was actually produced in Canada. W. A. Wilson, agricultural products representative, had the task of planning the dinner and securing the materials for it. High Canadian officials presided and the guests were members of the London provision trade and the press.

In addition to arranging the dinner, Mr. Wilson was called upon to respond to the toast to the "Produce Trade of Canada," and portions of his address are of great interest to the producers of Canada inasmuch as they indicate what he, as representing the Dominion, has pledged them to provide for the British market. Mr. Wilson's reply was, in part, as follows:

As stated on the menu card, the dinner served consisted of food products from Canada, and His kind recognition and warm support accorded to me by new and old acquaintances alike in planning for and securing the necessary supplies, made the undertaking pleasant.

Canada needs people to cultivate her unutilized lands; her producers need markets for their products; her railways and steamship companies need tonnage; and business men need the public's buying power. The people of the United Kingdom need food and the respective governments have negotiated repeatedly concerning plans to provide tonnage in the overseas dominions for this country's surplus population. The surest road to a successful permanent emigration policy is to establish a market for the products produced by the people you encourage to emigrate and whom we welcome. The United Kingdom is buying our farm products, its, in a large measure returned to you in orders for manufactured goods.

There is no conscious moral advantage and no material disadvantage in formulating a wide programme for marketing surplus food as a goal for the future and advancing to that goal step by step as occasion offers, rather than having existing similar measures gradually crowd out of use by popular demand. Macaulay's description of the new philosophy is fitting. He says: "His law is progress. A point which yesterday was invisible is its goal today and will be its starting point tomorrow." Our commercial situation is in the practical use and development of the great resources and possibilities of trading with the Empire.

The qualities so splendidly shown in the war did not finish when peace was declared, and whatever our difficulties are—and they are not insurmountable—I am certain we can rely upon the integrity and determination of our race to come through them successfully. We are not a people content with military achievement, only to be beaten in time of peace by the difficult problems of commerce. To improve the economic condition of our task, and through its accomplishment to cause a greater measure of freedom, contentment and happiness.

Canada's responsibility in that effort is, broadly speaking, the production of commodities possessing quality and character sought after and demanded by the best trade in your largest markets; to produce them in volume and to produce them regularly; no detail in their preparation being too small to be unworthy of our best attention.

Crime Increases
Crime in Chicago continues to match each other that it could well afford to pay each of its 30,000 crooks \$200,000 annually or \$600,000,000 to let a town, C. H. Hildner, president of the Chicago crime commission, told a church audience. He estimated that approximately one per cent. of the city's 2,500,000 population are engaged in criminal pursuits, and asserted that crime had increased 100 per cent. since 1909.

Trophy For Corn Show
A solid silver cup measuring 18 inches in height has been presented to the Saskatchewan Corn Growers' Association by the Saskatchewan Wheatmen Improvement Association as a trophy for the nation class to be competed for annually at the provincial corn shows. This trophy will be awarded for the first time in the third provincial corn show to be held at Indian Head on Nov. 18 and 19.

Chad invented the art of weaving 1,600 years before it was known in other countries.

W. N. U. 1002

Winter Care Of Poultry

Value of Substitutes for Green Feed in Poultry Feeding

During the winter months, when it is difficult to get sufficient green feed for poultry, certain substitutes may be used. In order to test the relative values of clover leaves, sweet clover meal, alfalfa meal and tomato pulp for this purpose an experiment was conducted in 1922-23 by the Dominion poultry husbandman at the Ottawa experimental farm. One pen was given clover leaves fed in the litter once a day, another was given clover meal mixed in the wet mash fed at noon, a third pen received alfalfa meal in the same way, and to the fourth pen tomato pulp mixed in the wet mash was fed. All the hens were fed a standard scratch grain and standard mash, beef scrap was kept constant, and the litter was changed twice a week and they had both salt and water to drink.

The clover meal gave by far the best results for production of cost of producing eggs and profit. Tomato pulp came second, alfalfa meal third and clover leaves last. The hatchability of eggs was not affected by the different feeds, however, exceptionally poor.

Good Apple Crop

Production This Year Is Expected To Exceed That Of 1924

Canadian growers of the apple crop for this year is now estimated at an increase of three per cent. over 1924, or 2,500,000 barrels, according to a report of the federal department of agriculture. The commercial apple crop in Ontario is now placed at 174 per cent. or 1,150,000 barrels—this is a record for this province. British Columbia is expected to contribute 2,215,135 boxes; Quebec, 56,683 barrels; New Brunswick, 55,453 barrels; and Nova Scotia, 620,450 barrels. All the provinces, with the exception of Ontario, show decreases.

Says Fish Industry

Second To Farming

Has Always Been One of Canada's Most Important Industries

The fish industry in Canada is second to agriculture, and since early times the fish trade has been one of the most prolific of the country, said Daniel J. Byrne in giving addresses at Canadian fisheries at the request of the Department of Marine and Fisheries. Consumption of fish per head per annum in Canada, he stated, is about 25 pounds, while in England it is 45 to 50 pounds, and in Japan more than 200 pounds.

Registered Cereal Seed

Estimated That Alberta Produced 360,000 Bushels This Year

Alberta had 19,625 acres of registered cereal seed this past season, according to the applications for inspection made to the federal branch at Calgary. There were 275 growers of cereal seed and while it is yet too early to make a statement as to the amount of registered seed there has been, it has been estimated that there will be around 360,000 bushels from Alberta.

Heavy Salmon Pack

British Columbia Catch Greater This Year Than Ever

British Columbia's salmon pack is due to be in excess of the same period in 1924, and last year was the first of the Dominion fisheries department which the total pack up to October 6th in the present season is 1,576,442 cases. Last year at the same date the pack was 1,273,625 cases.

Remembered His Manners

Little Mary was invited to a party. Before she left, her mother instructed her on table etiquette. When Mary returned, her mother asked her how she behaved. "Well," answered Mary, "when Mrs. B. passed the cake I took a piece. When she asked me to say 'thank you' I said, 'Yes, thank you,' and when she said the third time I didn't know what to say, mother. So I said what daddy always says: 'Take the damn thing away!'"

The Potential Killer

If judges, here and elsewhere, will keep their minds the very rapid fact truth that the speeder and the reckless driver are potential killers, and not actual killers only because they have had good luck that they don't deserve, they will impose sentences that will discourage recklessness and speed, and then they will help to reduce the appalling number of automobile collisions. (Herald, Herald.)

Saskatchewan Salt Lakes

Ingrit Lake Contains Over Twenty-five Million Tons of Glauber Salt

Sodium sulphate, sometimes known as "Mirabilite," or "Glauber salt," is found in many of the Saskatchewan salt lakes. The largest one is at Ingrit Lake, about 40 miles north of Hinton, on the Canadian Pacific Railway main line, but is not yet under development. It has been investigated by the Dominion Government and has an estimated deposit of over 25,000,000 tons of glauber salt, says the Financial Post.

Frederick Lake, south of Moose Jaw, Sask., is the most active commercial producer, a process of dehydration having been successfully commenced and shipments are being made to Ontario, Canada and the United States. Another deposit under active development is at Lake Mushkiki, three miles north of Hinton, on the Canadian National lines. There are a large number of these lakes in the province awaiting development, and when market requirements demand greater attention to this resource will be given. Sodium sulphate in the form of salt, is used in the manufacture of wood pulp by the sulphate process, plate glass, window glass, bottle glass, etc. Glauber salt is used in dyeing, tanning, medicinally, especially for the treatment of cattle, as a constituent of so-called stock feeds, and so on.

Fewer Veterinaries

Where Is the Picturesque Horse Doctor Of Bygone Days?

Fewer veterinaries—particularly of the "horse doctor" type, the picturesque figure who, mounted to the rear would drive for miles to attend some animal's wants—are to be found today than at any time in the past two decades. Total registrations at the Ontario Veterinary College have dropped from 373 in 1914 to 70 at the present time. The demand for veterinary supplies and equipment is also now practically negligible. To some 650 men in all, according to the Ontario Veterinary Association, is used exclusively the professional care for Ontario's livestock.

The answer is that quality and not quantity is wanted in the veterinary profession today. Skilled, well-equipped laboratories, where diseases work through microscopes, to occupy the centre of the stage in the battle for better health of Canada's livestock.

Use Novel Method

Steel To Combat Grasshopper Pest In

Upon a suggestion made by the American chamber of commerce of Mexico, a large order for wire has been placed with a United States steel company to be used in combating the grasshopper plague-devastating sections of Southern Mexico. The method to be employed is to build barriers across the line of march of the grasshoppers, before they reach the firing stage of their emigration against which the grasshoppers will fight. Then they are to be faked back by machine guns, after which they are to be backed and sold as poultry feed.

The method outlined above has been extensively used in the Argentine republic where 32,000,000 pounds of grasshoppers each year are destroyed.

Keeping Radio Going

Radio stations operated by the Royal Canadian Mounted Police in Northern Manitoba will be kept in service during the winter months. The stations are located at Victoria Beach, Norway House and Comox, B.C.

We doubt if even a great and famous carrier could explain to a barber exactly how he wanted his hair cut.

Keeping Miling Records

Practices of Weighing the Milk Is Recommended to Dairy Producers

A practice that is generally followed and advocated at the illustration stations in Eastern Quebec conducted by the Dominion Government, is that of weighing each cow's milk. There are too many cows, says the supervisor in his annual report, that do not produce sufficient to pay for their feed. By weighing the milk these animals can be put on the most economical ration. The average of thirteen herds is given as 6,245 pounds, which is better than the average production of cows in Canada, and indicates considerable improvement brought about by the methods pursued. Realizing that more milk could be produced by more intelligent feeding and breeding, states the supervisor, Mr. J. H. Tremblay, B.S.A., five operators have been induced to purchase pure-bred cows with dairy record qualifications. Other operators are expected to follow suit in the near future. The production of the thirteen herds quoted there is the wide margin of over 4,000 pounds in the average per cow, the best average of a herd comprising eleven cows having 7,267 pounds and the lowest average of one consisting of 13 cows being 3,156 pounds. The production of a herd of thirteen cows was 11,649 lbs. to a herd of 10 Ayrshires 9,250 lbs. and in a herd of grade cows 7,267 lbs. The best in a herd of grades standing at the bottom of the list is 2,831 lbs. It is hardly necessary to say that the keeping of these records is an incentive to better feeding and better breeding.

British Columbia Timbers

Exhibit Shown at Wembley Has Resulted in Large Orders From Britain

As a result of the British Columbia exhibit at Wembley, many prominent architects of the United Kingdom are visiting the province to view the new and beautiful interior decorative schemes which are obtainable with the now well-known British Columbia timbers. Wembley has proved a most valuable place before the public in general, and architects and builders in particular, showing the quality of the timber and the possibilities of the new material. It has played a most important part in the pronounced increase of timber orders to a timber expert in the United Kingdom.

Canadian Butter Shipped To Orient

Large Quantities Are Shipped to China, Japan and the Philippines

Last year Canada shipped to Japan 253,400 pounds of butter, to China 259,000 lbs., Hong Kong 20,000 lbs., and to the United Kingdom 767,570 lbs. All through the port of Vancouver. The majority of the shipments went from Alberta. Altogether some 2,600,000 pounds of butter were exported through Vancouver last year.

Is Far From Bankrupt

"The wildest nonsense," was the expression used by Right Hon. Sir Robert Horne, former chancellor of exchequer in the British government, in characterizing suggestions made recently by a British shipowner that Great Britain is heading for bankruptcy and ruin.

Brides Are Disappointed

Disappointed wives are returning daily from America to their homes in France. It has been estimated that as many as 30 per cent. of the marriages between American soldiers and French girls have resulted in a failure.

Dairy Cattle For China

The first shipment of pure-bred dairy cattle from British Columbia to Southern China left Vancouver recently, when thirty head of stock went forward to Shanghai.

Unoccupied Lands In West Greatest Single Asset In Sight For Canada's Future Growth

Prize Winning Butter

Settlers From Britain Meet With Success in Canada

In just over four months from the time of her first arrival in Canada, Mrs. W. N. Smith, who with her husband and six children came to Canada under the British family farm settlement scheme at the end of last May, has become a prize-winning butter, cheese and cream maker. At the fall fair recently held at Miller, British Columbia, Mrs. Smith won first prize for fresh butter, first for fancy butter, first for cream cheese and second for clothed cream.

Mrs. Smith made good butter and cheese on her husband's farm in the Old Country and shortly after she arrived on the now 40-acre farm at Port Langley, B.C., early last June, she began again to put her knowledge of making dairy products to practical use. A family of six children ranging in ages from 19 to four years, produced her own excellent butter. She registered a similar verdict. The field officer of the land settlement branch of the department of immigration and lands, advised Mrs. Smith to compete with her butter and other dairy products in the Milner fall fair, so close to the recent agricultural show.

Robert J. Alway, Another British Settler, Who Came to Canada Last April, Is Now a First Prize Winner of a Horse, First for a Cow and Two Second Prizes for Cows at the August 23rd, Fall Fair.

Mr. Alway was a farmer near Bristol, England. He has a wife and two children, a girl of 17 years of age and a boy of 12 years. The boy may claim a share in the honor of winning the prizes for it was he who prepared the animals for the show.

Mining In British Columbia

All Records For Mineral Production Will Be Broken in 1925

All yearly records for mineral production both from the standpoint of quantity and value, will be eclipsed in 1925, according to the mining operations for the first eight months of the present year. Issued by the B.C. minister of mines. It is estimated that the monetary value of the mineral production for the first eight months of 1925 is approximately \$14,600,000. This indicates that the total final production for the year 1925 will approximate at least \$40,000,000, an increase of \$11,252,254, or 23.12 per cent. over the total for 1924, hitherto a record for the province.

Shipping Wheat Via Vancouver

Shipments of Wheat From Vancouver During the First Two Months Ended September 30, 1925, Were 1,457,944 Bushels, and Receipts \$32,230.

For the whole of last year approximately 25,000,000 bushels of wheat passed through this port, and it is anticipated that the wheat movement through Vancouver this year will equal, if not exceed, that of 1924.

France Honors Canadian Ace

Major W. E. Sussan, Ottawa, Ontario, in command of the Sherbrooke Cavalry, 27th Regiment of Aviators, French Air Forces in the Moroccan war, has been awarded a Colonial Cross and received creditable mention in dispatches for the valiant services of the Canadian ace in fighting the Italians.

Recognizes Voice Over Radio

The strange experience of recognizing a voice 3,000 miles distant after not having heard it for 15 years is a feat for radio artists. When Leo Dryden, the variety singer, broadcast songs from Newcastle-on-Tyne recently, he was recognized by a lady who declared to be the most perfect replica of the voice while listening. Wheeler Dryden and his father have not met for 15 years.

Plea For Plain English

Speaking before the British Association for the Advancement of Science at Southampton, England, Sir Oliver Lodge asked that scientists talk in plain English. A particular appeal was made to biologists, who were declared to be the most prolific cultivators of troublesome words.

New B.C. Fox Farm

Portland Island, near Moreau Bay, B.C., has been bought by E. H. Westerton, of Shanghai, for the purpose of converting it into a fox farm. The island is approximately five hundred acres in area and is owned by Westerton's father-in-law, who was declared to be the most perfect replica of the voice while listening. Wheeler Dryden and his father have not met for 15 years.

Minsk, Japan Will Convert It Into a Naval Base.

Instead of scrapping the warship

ENGLISH BEAUTIES INVADE CANADA

J. W. Jackson's "Twelve English Beauties," who recently performed before their Majesties, the King and Queen, at the Alhambra Theatre, London, arrived in Canada on the Canadian Pacific liner, Minotaur, for a thirty week tour of Canada and the United States, departing at Montreal, October 19.

English dancing actresses in their Apple York season in the production of "Charles and Loretta." This dazzling dance evidently anticipate a similar conquest.

BARRE, SON OF KAZAN

James Oliver Curwood
A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BARRE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog. Is an Adaptation of This Story

SYNOPSIS

Nepesee, daughter of Pierrot, the trapper, took Barre, son of Kazan, into the woods and the two spent their time there. Barre was quite unimpaired, but the girl was determined to make a bet of him. Nepesee was quartered in the woods, and in her veins. In a few days she would be seventeen years old and her father had brought her ribbon for her hair, and some material for a new dress. Meanwhile, the government man had arrived, took photographs of the girl in her birthday party.

CHAPTER XVI.—Continued

It was late in August when Barre saw the first of his kind outside of Kazan and Gray Wolf. During the summer Pierrot allowed his dogs to run at large on a small island in the centre of a lake two or three miles away, and twice a week he netted fish for them. On one of these trips Nepesee accompanied him and took Barre with her. Pierrot had his long caribou tag whip. He expected a fight, but there was none. Barre fought the pack in their run for fish, and ate with them. This pleased Pierrot more than ever.

"He will make a great sled-dog," he chuckled. "It is best to leave him for a week with the pack, ma Nepesee."

Reluctantly Nepesee gave her consent. While the dogs were still at their fish, they started homeward. Their canoe had stolen well out before Barre discovered the trick they had played on him. Instantly he leaped into the water and swam after them—the Willow helped him into the canoe.

Early in September a passing Indian brought Pierrot word from Bush McGargat. The Factor had been very sick. He had almost died from the blood-poison, but he was well now. In the first exhilarating part of autumn in the air a new dread oppressed Pierrot. But at present he had nothing of what was in his mind to Nepesee. The Willow had almost forgotten the Factor's name. He went for the glory and thrill of wilderness autumn was in her blood. She went on long trips with Pierrot, helping him to blaze out the new trap lines that would be used when the first snows came, and on these journeys she was always accompanied by Barre, who was "my minister I will have him the finest dog in the pack, mon pere!" This was the time for Pierrot to say "I am going to send you down to the school at Nelson House again this winter, ma cherie," he said. "Barre

NERVES AND FAINTING SPELLS

Sent Woman to Bed. Great Change After Taking Lydia E. Pinkham's Vegetable Compound

Sarnia, Ontario.—"After my girls were born I was a wreck. My nerves were too terrible for words and I simply could not stand the walk. I had no sleep. I suffered with fainting spells until I was no longer able to take my household duties and had to take to my bed. The doctor said I should have an operation, but I was not in a fit condition at that time. My neighbor said, 'Why don't you try Lydia E. Pinkham's Vegetable Compound?' I am sure it will do you good and will cure these doctor's bills." So I was advised by my husband to try it after I told him about my condition. I was so weak that I was unable to take a few boarders for a while. My nerves were so weak at that time. My baby is 17 months old now and I have not yet had an operation. I have taken this medicine. I have recommended the Vegetable Compound to all my friends. I know and have told them the good it has done me. I know I feel and look for the different women there. I have been well and I certainly would not be without a bottle of your medicine. I have been well. You can use this letter as you see fit. I should be only too glad to tell you of my suffering as I have to know what it has done for me. —Mrs. J. E. Sarnia, Ontario.

A recent canvass of women users of the Vegetable Compound has shown that of 100 recoverable beneficial results. This is a remarkable record of its merit. C

DISTEMPER COMPOUND

Along with the beetle and stir of the beginning of the trapping season, McGargat began to prepare his house for the coming of Nepesee. He knew what she liked in the way of cleanliness and a few other things. He had the log walls painted white with the lead and oil that were intended for his York boats. Certain partitions were torn down, and new ones were built; the Indian wife of his chief runner made curtains for the windows, and he convalesced a small photograph that should have gone on to Loe in the house. He had no doubts, and he counted the days as they passed.

Down on the Gray Loon, Pierrot and Nepesee were busy at many things, so that at times Pierrot's fears of the Factor at Loe had been forgotten, and they went out of the Willow's mind entirely. It was the old moon, and it shined with the anticipation and excitement of the winter hunt. Nepesee carefully placed a hundred traps in the snow, and she had a heavy dress, while Pierrot made fresh dead-falls ready for setting on his trails. When he was gone some time a day from the cabin, she was always with him.

It was the Willow's voice which came to her, and she was used to the movement of her lips, her gesture, the pulse of her body, the changing moods which brought shadow or sunlight into her face. He knew what it meant when she smiled; he shook himself, and often jumped about in his sympathy, when she wept. He knew her happiness was a part of him, a stern word from her was worse than a bad twelve miles of trail, and she knew that Barre had sprung back and faced him with barefaced anger and an angry snarl, the great alone his hand standing up like a wall. And one of the other dogs do this, Pierrot would have half killed him. It would have been nothing, and the next morning he would have been always safe. A touch of the Willow's hand, a word from her lips, and the great slowly settled the seat went out of his throat.

"Pierrot was not at all displeased. 'Dile!' I will never go so far as to try to whip one of my dogs. I will be a wild beast—and his slave. For he would kill him! So it came, through Pierrot himself and without telling his reason for it—that Barre did not become a sled-dog. He was allowed his freedom, and he was never dead, like the others. Nepesee was glad, but did not guess the thought that was in Pierrot's mind. To have such a fine sled-dog, she would never know why he kept Barre always suspicious of him, even to the point of making him suspicious of his own sled-dog. With himself he reasoned: 'If I make him hate me, he will hate all mine. My dog! That is good.' So he looked into the future—far. (To be continued.)

CHAPTER XVII.

Back to Loe, Loe, late in September, came McGargat, the man-maker. For ten days McGargat, the investigating agent, had been Bush McGargat's guest at the post, and twice in that time he had come in McGargat's canoe, and he had been told to creep upon him while he slept and kill him. The Factor himself had little attention to her now, a fact which would have made her happy if it had not been for McGargat. He was enraptured with the wild, rhymous beauty of the Cree girl, and McGargat, with jealousy, encouraged him. He was tired of Macie.

McGargat told McGargat this. He wanted to get rid of her, and McGargat could possibly take her on with him it would be a great favor. He explained to her. A little later, when the deep snows came, he was going to bring the daughter of Pierrot De Quenne to the post. In the return of their brotherhood he told of his visit, of the manner of his reception, and of the incident at the camp. In spite of all this, he assured McGargat, Pierrot's girl would soon be at Loe. Loe.

It was at this time that McGargat came. He remained only one night, and without knowing that he was adding fuel to a fire already dangerously blazing, he gave the photograph he had taken of Nepesee to the Factor. It was a splendid picture.

"If you can get it down to that girl some day, I'll be mighty obliged," he said to McGargat. "I promised her one. Her father's name is De Quenne—Pierrot De Quenne. You probably know them. And the girl—"

The next day McGargat started for Norway House. McGargat did not go to himself, and at night, under the glow of his lamp, he looked at it with thoughts that filled him with a growing resolution. There was but one way. The scheme had been in his mind for weeks—and the picture determined him. He dared not waver. He had given over to McGargat. But it was the one way. It would give him Nepesee. Only—he must wait for the deep snows, the mid-winter snow. They buried their tragedies deep.

McGargat was glad when McGargat returned with the picture. He kept it to himself. He was glad. He went off a runner with a load of presents for her people, and the message: "Don't but her. Keep her. She is his wife."

DODD'S KIDNEY PILLS

THE LARGEST ALIVER NUGGET EVER MINED IN BRITAIN. CUMBERLAND WEIGHS 35 OUNCES.

Regulate on the Farm—Every farmer and stockman should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

The Swiftest Elevators
The swiftest lifts or elevators in the world are said to be at the Swanley London. There are three in the clock room which speed at the rate of seventy five miles an hour. When a button is pressed, the lifts, with their cargo of hats and coats, are shot like a rocket to a room 100 feet above in a little more than one and one-half seconds.

The largest silver nugget ever mined in Britain. Cumberland weighs 35 ounces.

Monument To Skill Of British Engineers

Great Dam in Egypt Irrigates Over 30,000 Acres Of Desert. Monument to the skill of British engineers and contractors are spread over the four quarters of the globe. The latest and one of the greatest—the Makbar dam, on the Blue Nile, 250 miles south of Khartoum, Egypt—will be officially opened by one of King George's sons in January next. The dam, the construction of which involved the expenditure of several million pounds, is already fulfilling its allotted task for the contractor—Lord Cowdray's firm, who were under a penalty of \$500,000 a day if water was not flowing over the desert by July last.

The construction of the dam was under the direction of one of the partners, Sir P. T. Hopkins, an engineer of great experience. Over 20,000 men were employed on the work, which could only be carried on for seven months each year—from November to July, for during the other five months the Blue Nile is in flood. The dam is two miles long, and creates a lake 50 miles long, two miles wide and 50 feet deep. From it runs a canal and nearly 10,000 miles of waterways, which irrigate over a million acres of desert. Cotton fields now flourish where a few months ago there was nothing but waterless desert, and the output of the Egyptian cotton is greatly increased.

BABY'S OWN TABLETS AN EXCELLENT REMEDY

For Any of the Many Minor Ailments of Infants and Young Children

No mother can expect that her child will escape all the ills to which babies and children are subject, but she can avoid many of them by the use of Baby's Own Tablets. There are a multitude of troubles which will disappear. To do this nothing can equal Baby's Own Tablets.

There are a multitude of troubles which will disappear. To do this nothing can equal Baby's Own Tablets. There are a multitude of troubles which will disappear. To do this nothing can equal Baby's Own Tablets. There are a multitude of troubles which will disappear. To do this nothing can equal Baby's Own Tablets.

Concerning Baby's Own Tablets. Write: "Kindly send me your book on Baby's Own Tablets. I am suffering from colic and indigestion, colds and simple ailments. I have heard that Baby's Own Tablets are a wonderful medicine for little ones."

Baby's Own Tablets are sold by all medicine dealers or will be sent by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Man's Color Depends On Salt

Scientist Tells Why Races Are White, Yellow, Red, Black

An eminent scientist, speaking of the significance of common salt, states that one's color is dependent upon the amount of sodium in the blood. The chances are that your complexion is fair. In Northern Europe, for example, where the climate is cold and the amount of salt in the soil is low, the chances are that your complexion is fair. In Northern Europe, for example, where the climate is cold and the amount of salt in the soil is low, the chances are that your complexion is fair.

Pastimes Of Wise Men

Skipping Pebbles Was Favourite Pastime of Famous Writers

Though playing darts and draughts on the weather can hardly be deemed the intellectual pastimes of great men, there have a peculiar fascination for men of letters. A friend who spent a week with Alfred Russel on the banks of the Great Ouse, has just confessed that the poet spent almost the whole time trying to make pebbles skip across the waves, and Mr. Lewis Carroll tells of a whole afternoon which he and Joseph Conrad and H. G. Wells spent on the beach at Sandgate engaged in the same pursuit.

Dressed Turkey Pool

A voluntary pool for the benefit of distressed turkeys will be operated in Saskatchewan this fall by the co-operation and markets branch of the provincial department of agriculture. The dressed turkey pool will be open to any turkey raiser in Saskatchewan, providing a local organization is available through which the birds may be assembled.

Women are naturally fond of shoes, because they were made to match the feet.

Prince of Wales Must Study Transforming the Province

Should Consider Seriously His Life's Work Says King George

The Prince of Wales must go back to school on his return from his South American tour. The King has decided the time has come for the Prince to study seriously the work he will have to do when he takes the throne. With this thing in mind, the King has prepared a definite course of instruction for the Prince. The Prince's education at Oxford was interrupted by the war and his travels abroad, on diplomatic missions, have not permitted him to do a great deal of studying. It is admitted that at times he shows an education is not all that is besting one destined to succeed to the British throne. Economics, civil government, history and legal procedure are subjects in the curriculum the King has laid down for the Prince.

She Couldn't Sleep Heart Was So Bad

Mrs. J. D. McClellan, Charlotte, N.C., writes:—"About a year ago I was greatly troubled with my heart."

I could not sleep at night and was so nervous I imagined that I could see everything in the room moving, and would have to turn on the light before I could get to sleep.

After having read of your

MILBURN'S HEART NERVE PILLS

I took several boxes of them, and can now get a full night's sleep without any trouble, and feel fine in every way."

H. A. N. Pills have been on the market for the past 25 years; all dealers sell them; put up only by The N. B. Co., Lincoln, Toronto, Ont.

About one-fifth the population of the United States lives in villages.

A torpedo takes four minutes to reach a target 6,500 yards away.

The human heart is as much a machine as the most intricate part of the human body. It has been figured out that an average body of 70 begins to minutely that the heart beats 4,600 times an hour, 100,000 a day, and more than 20,000,000 a year.

The Baby's Cold

WORLD HAPPENINGS BRIEFLY TOLD

A report from The London Sunday Express that Lord Peel probably would be the next Governor-General of Canada in succession to Lord Dufferin is emphatically denied by Lord Peel.

The oldest voter to go to the polls in Nova Scotia, and it is thought in Canada, was Miss Anna Fraser, of Antigonish, 105 years old, believed to be the oldest woman in the province.

Thorp Howard Nowell, of West Canada, a former Canadian, who was kidnapped with a party of missionaries in August, is expected to have returned to Chengtu.

Commemoration of the gliding of a 34-foot boat was accomplished by Harry Peterson, 54 year old photo printer, who has made out at San Pedro, Cal., after sailing 23,000 miles.

Eight hundred sheep from Roderick Macleay, High River, Alta., the biggest single shipment of cattle since the sheep arrived in England recently in a train of 21 cars.

A school for women motor drivers has been opened at Iqadon, Japan. The women will be given instruction on how to drive and will also be taught the practical working features of machines.

Reports from Berlin that Germany will insist upon the employment of German as an additional official language once Germany enters the League of Nations is not credited by the league officials.

Major Col. N. Donald, of Chemanias, D.C., formerly commander H.M.C.S. Amherst, wrecked on the west coast, at Vancouver Island during a storm some weeks ago, but was transferred to the command of H.M.C.S. Ypres at Halifax.

Major Girty, who two years ago lost Russia's 24th man, was finally recovered his health and is writing every day on what he believes will be his masterpiece, a novel portraying life in Russia during the last forty years.

James Buchanan Price, who sold newspapers of the "Prince of Duke University, Oklahoma City, last year, has been informed that he is recommended as one of 10 relatives who will share \$2,000,000 left by his late father, to be known.

A wooden infant has been sold as a curiosity in New York for \$250, after being shodding. It was one of the smallest infant ever, and was equipped every telegraphic apparatus with a telephone and a box of wooden chords.

Word is received at the death while on his way to Glasgow of Professor Mar, formerly occupying the clinic of political economy at University of Edinburgh. Professor Mar was born in Scotland 71 years ago, was world-famous as an author and lecturer on economic subjects.

Mrs. Anne Buesnel

While the League of Nations is taking active steps to suppress slavery in the western world, word comes from India that the council of the regency of Jodhpur has passed a law legalizing virtual human bondage in its territory.

The regulation, which was adopted after the Maharajah of Jodhpur, who is a Hindu, inaugurates a system of dragoons, under which land servants are made the virtual property of the master. The land servants' daughters are considered as chattels and often are given away as part of the dowry of the master's daughters. The dragoons himself is now forced by law to live in a style inferior to the master.

Human Bondage is Legalized in State of Jodhpur, India

While the League of Nations is taking active steps to suppress slavery in the western world, word comes from India that the council of the regency of Jodhpur has passed a law legalizing virtual human bondage in its territory.

The regulation, which was adopted after the Maharajah of Jodhpur, who is a Hindu, inaugurates a system of dragoons, under which land servants are made the virtual property of the master. The land servants' daughters are considered as chattels and often are given away as part of the dowry of the master's daughters. The dragoons himself is now forced by law to live in a style inferior to the master.

Sweden Developing Air Service

Nearly \$20,000 is being set aside by the Swedish government this year for the establishment and maintenance of a regular air service. A new air service between Stockholm and Danzig was established recently by Nordiska Flygskedet.

Billy's Age

"How old are you, Willie?" "I'm at home, 12 at school and 11 on the train."

Britain's Mystery Battleship

The Nelson by All Accounts Will Be Big Addition to British Navy

In England the battleship Nelson, which was launched on Sept. 3, has been called the "mystery ship," because the facts about her horsepower, armor, her belt, deck, hull, and gun positions are so contradictory that her displacement will be 35,000 tons, her length 215 feet, her beam 100 feet and her draught 30 feet, and that her main battery will consist of nine 16-inch guns, one more than are carried by the most powerful three ships of the Royal Navy class.

The Nelson is one of two battleships, the other being the Rodney, which the Washington Navy Treaty allows Great Britain to build that they may take the place of the King George V. class, Contarion and Thunderer in 1927. Today the Japanese navy contains the most formidable battleships, the Mutsumi and the Nagato. They are superior to three British battleships in being faster by two knots, 24 an hour to 21. They are their most considerable advantage. That she is longer by 90 feet, but of about the same beam.

The Japanese ships are furnished with light torpedo tubes, two on each side. There are the same batteries 16-inch guns. In secondary batteries the Japanese seem to have an advantage in twenty 5.5-inch guns, compared with twelve 5-inch guns, for the American ships.

This advantage does not seem to be offset by eight 5-inch guns on the American ships. As one extra 16-inch gun might decide a sea fight, the two Nelsons, which the British admiralty will have in commission in 1927, must be considered more powerful than the best of Japan and of the United States.—Letter in New York Times.

Wembley Exhibition

Not Financial Success

But Ultimate Results Will Be Incalculable

The British Empire exhibition, which opened at Wembley in 1924 to develop the trade of the British Empire, which it closed Oct. 21, has been a financial failure.

In the two years it has been running, 20,000,000 persons have visited the exhibition, but in spite of its popularity, largely due to the potent attraction of the King, the members of the Royal Family, and prominent persons, it has not proved a financial success.

It is contended, however, that the ultimate results will be incalculable in money. The exhibition is expressed that it will prove to have stimulated trade and aided in the development of the resources of the empire.

It was an elaborate closing program.

Words, by the irritation that they cause in the stomach and intestines, diverting of the nourishment that they should derive from food, and malnutrition is the result. Miller's talks with the King, the members of the Royal Family, and prominent persons, it has not proved a financial success.

Britain's Will To Recover

The Will to Win Always Uppermost in the British Character.

The British nation is always at its best when it recognizes that it is "up against it." Some nations are at their best when they are at their worst, when they are being carried forward in the rush of a successful advance, and when "uplift" is poured into their hearts.

Our own people, for some reason which is not entirely explicable, do not have either their alertness or their capacities fully developed until they know that they are near a disaster. This is probably a trait of the nation in history as it is certainly true of the nation in war.

Manually wrote a glowing passage about the British power of recovery. This power is with us still, we are convinced that all that is necessary to evoke it is to convince the people that the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

The Frontier College

Provides Opportunity of Bringing Education to the Worker at His Work.

The Frontier College has just published its first calendar. This contains many interesting educational features. While its courses are varied, there are no restrictions made by way of enforced attendance at some central institution.

It is the purpose of the Frontier College to bring education to the worker at his work. The established universities give prizes and scholarships every year for a degree, are made available for all, who have the capacity, the energy and the time to study, while the circumstances of their life and work.

But while much latitude is given in the matter of options (there is no restriction of choice), the degree of instruction, certain subjects such as Forestry, Biology, Agriculture, subjects very vital to Canada, with its ever present problems of settlement, reforestation and immigration, are made compulsory.

An examining board has been organized, which members among its members many men who have already won a Dominion-wide reputation in their special fields. The calendar may be had upon application to the Frontier College, 67 Young Street, Toronto.

All Night with Asthma. Everyone knows how attacks of asthma often keep their victims awake the whole night long. Morning drowsiness is left unrefreshed for a day of business, and business is left unrefreshed for a day of business.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

It is not only the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion, but the time has come when they must rise to the occasion.

20-Blackberry bush.
21-Situation.
22-Revolutionary war.
23-First name.
24-Ethan.

Canada's Foreign Trade

Dominion is Now Among First Nine First Nations of the World

Canada's foreign trade last place here among the first six nations of the world as an exporting and importing country, a place which she has won not only by the export of her vast animal grain crops, but also as a manufacturing power. In the year ending August 31, 1925, the exports of the Dominion reached new heights when the total value of her export trade was placed at \$1,219,153,857.

An Oil that is Famous—Though Canada was not the birthplace of Dr. Thomas' Eclectic Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far ahead enough to attest its excellence, for in all these countries it is on sale and in demand.

B.C. Pulp Goes To Japan

Canadian pulp practically controls the Japanese market, as far as price is concerned. During last year between 2,000 and 3,000 tons of pulp from British Columbia have been imported into Japan, out of a total of some \$250,000 to \$300,000 tons from all countries. It is anticipated that Quebec will presently enter in the field.

More than 200,000 students enroll every year in agricultural schools of the United States.

Forest fire during last summer are blamed for a short shortage.
